

CONDENSED SOURDOUGH RECIPE/METHOD for crusty artisan loaf

Recipe for 1 loaf:

- 1 c. Sourdough start. (Bubbly and active.)
- 4 c. Bread or all-purpose flour.
- 2 tsp. Salt.
- 1 ½ -1 ¾ c. warm water.

Feeding your start = ¾ c. warm water & 1 c. flour (I do bread flour). Aim for thick pancake batter consistency.

METHOD: makes 2 loaves- (All times are flexible).

1:00 p.m. - Take 1 cup starter out of your jar and feed it. Leave on the counter.

5:00 p.m. - Divide your starter into two bowls. One cup in each. This is your 1 cup of active start needed for a recipe. **Add in the rest of the ingredients for 1 recipe to each bowl and combine.** Cover bowls and let rest 30 minutes to 1 hour on the counter.

6:00- Do your first set of folds. Uncover and pull around the perimeter of your doughs to the center to fold and stretch your dough. 8 ish pulls. Cover. Over the next 5 hours aim to fit in 3-5 folds.

7:00- Do another set of pulls. Cover.

8:00- Do another set of pulls. Cover (transfer to the fridge after your third pull if you have time, fit in a few more pulls.) If you would like to add mix ins (raisins, nuts, cheeses, spices, now is the time. Sprinkle them in. They will be dispersed through the dough on future folds.

9:00- Do another set of pulls. Place dough on parchment paper, pat/tuck/drag edges into a circular shape and place dough back inside of the dirty bowl using the parchment paper to lift it. Cover.

Move both bowls to the fridge overnight.

Morning: 6-8 a.m. - Take both bowls out of the fridge. They will sit on the counter for 1-2ish hours.

Score- gently flour the tops of the loaves. Score with kitchen scissors or bread lame.

Bake: Transfer bread to cast iron pan or baking pan with lid using the parchment. Place lid on and put in the oven. Bake at 450.

- If putting directly into a cold oven bake 45-50 min and then remove the lid. Bake 5 min further to brown.
- If oven is preheated, bake 35-40 min. Remove the lid. Bake 5-10 min more to brown.

Transfer to a wire cooling rack and let cool at least 30 min before slicing. Store cut side down on the counter for up to 3 days or freeze for up to a 1 month.

Sourdough Sandwich Bread- Amber's Kitchen

INGREDIENTS:

- ☐ 2.5 cups warm water
- ☐ 2 cups active bubbly starter (stirred down to deflate air bubbles, then measured)
- ☐ 3/4 cup honey (can do less or sub ½ cup white or coconut sugar)
- ☐ 1 egg
- ☐ 1/3 cup melted coconut oil (can sub any neutral flavored oil)
- ☐ 1 Tablespoon salt
- ☐ 8 to 8.5 cups unbleached bread flour (or unbleached all-purpose flour)

DIRECTIONS:

1. **The night before...** Activate your starter by feeding it so you have a total volume of at least 2 cups.
2. **In the morning....** In a large bowl or if using a mixer, combine 2 cups of active bubbly starter with the water, honey, oil, egg and salt. Mix gently to combine.
3. Add the flour one cup at a time, while mixing. When the dough pulls away from the sides of the bowl, is tacky but doesn't stick to your fingers then it has enough flour.
4. Knead the dough for 5-15 minutes or until the dough is smooth and elastic. This can be done either by hand on the countertop, or can be done using a bosch mixer or a kitchenaid pro mixer. Cover dough with either plastic or a clean dish towel and let rise until doubled in size on the counter.
5. **1 PM ish:** When the dough has doubled in size, dump it out onto a lightly floured surface and divide in three equal portions. Form into an oval and place each in a greased loaf pan.
6. Cover dough and let rise until doubled a second time. This may take anywhere from 3-12 hours. Usually its 3-7 for me depending on the temperature.
7. **6:00 PM ish:** Once it has doubled, bake at 375° F for 40-45 minutes. If the tops of your loaves are browning too much, you can lay a flat sheet of aluminum foil on top of the loaves, but add two minutes to the baking time if you cover with foil. This has a tendency to underbake at times under 40 min. So start with that and shorten time if you find it dry.
8. Remove loaves from the oven, remove loaves from pans and let cool completely, (about one hour) on a cooling rack before slicing.
9. Store in **plastic twist tie bags** at room temp. Freeze loaves that won't get eaten in 4-5 days.

Sam's Sourdough Waffles

Ingredients:

2 cups all-purpose flour
1 ½ cups water
1 cup sourdough starter
½ cup vegetable oil
2 eggs
2 tablespoons white sugar
2 teaspoons salt
1 tablespoon water
1 teaspoon baking soda (dissolve soda in 1T water listed above. Don't skip!)

Directions:

1. **(Before going to bed)** Mix flour, 1 1/2 cups water, and sourdough starter together in a large bowl to make batter; cover loosely with plastic wrap and let sit in a warm place until filled with large holes and bubbles, 4 hours to overnight.
2. **(In the morning)** Stir oil, eggs, sugar, and salt into the batter; mix well to combine.
3. Whisk 1 tablespoon water and baking soda together in a small bowl until dissolved. Fold into the batter with a rubber spatula.
4. Preheat a waffle iron according to the manufacturer's instructions.
5. Pour about 1/3 cup batter onto preheated iron and bake until crisp and golden, according to manufacturer's instructions, about 3 minutes. Continue making waffles until all remaining batter is used.

Sourdough Pizza Crust

Makes four 8-10 inch personal pizzas. Doubles great. Freezes excellent!

Ingredients:

- 1 1/2 c. Warm water
- 1 Tb. Sugar
- 1 c. Active bubbly starter
- 1 **heaping** tsp. Salt
- 2 TB. Olive oil (or neutral flavored oil)
- 4 c. Flour

Method:

1. Feed your start in the morning. Begin making recipe as written below at noon.
2. Mix all together by hand or in mixer and knead for 5-10 min. It's forgiving here. Add flour as needed to make it workable.
3. Place in a bowl and cover. Place in a warm spot and let rise for 4-5 hours.
4. Deflate and let rise another hour or begin making pizzas!
5. Preheat oven to 425 degrees.
6. Pull off 1/4 of the dough and roll out using extra flour on top of parchment paper. Top with sauce, cheese, and desired toppings. Place in the oven on a bread stone if you have it/cookie sheet if you don't. About 5-10 minutes in, use a spatula to lift edge of the crust and pull parchment out from under the half baked dough. Finish baking another 5-10 min. Until crust is golden and toppings melted and crisped.

Notes: I always just eyeball cook time & temperature. Makes a thicker crust so roll thin if you prefer! Sautee veggies before assembling on pizza.

FREEZING INSTRUCTIONS: If I have leftover dough, I simply deflate it and roll into a ball or disc. Next wrap with saran wrap and place in freezer bag. I make these discs the size of individual pizzas. When it comes time to use the dough place in the fridge the night before and let it come to room temperature for a couple hours before rolling out and building pizzas.
